Executive Summary

- **Real GDP is projected to grow 2.0% yearly** on average between 2024-26⁽¹⁾, above most European peers
- With a **diversified and open Economy**, the main engines of growth are Investment at 3.8%⁽¹⁾, Exports at 3.5%⁽¹⁾ and also Private Consumption at 2.2%⁽¹⁾
- Manufacturing (mechanical & electronics, chemicals & plastics, automotive & mobility, textiles & clothing and renewables) but also Travel and tourism fuel the exports sector (almost 50% of GDP; 60/40 between goods and services), contributing to a **growing current and capital account surplus** (4.1%⁽¹⁾ of GDP)
- **Public accounts are in surplus** (1.2% of GDP in 2023 and 0.4% forecast in 2024) and are expected to remain, with tax revenues growth accommodating the adoption of policy measures to combat the rising cost of living and increase the country's competitiveness
- **Strong primary balances** combined with economic growth have resulted in a sharp decline of public debt (97.9% of GDP in 2023) and will continue to bring debt down by 3 to 4 pp yearly, as part of a process of deleveraging in the entire Economy
- **Banking sector profitability** increased considerably, with improvement in asset quality and rise of net interest margins
- **Prudent public debt management** has kept risks at bay, with a lower refinancing risk (around 40% for 5 years) and a safe weighted average maturity (above 7 years)
- Past the **surge of retail demand in 2023**, savings certificates net issuance has reverted to trend, which made PGB net issuance positive again in 2024
- Despite the increase in net cash requirements of the State, **net issuance of PGB decreases to EUR 6.9 billion in 2025** (from EUR 9.1 billion in 2024)

GDP sector breakdown by GVA in 2022

Portuguese exports have proven to be competitive, diversified and dynamic

Advanced engineering (electrical & machinery) and Automotive & Mobility are two of the main exporting sectors

[Main exports by product groups as % of total exports 2023; Compound annual growth rate 2019-2023 %] [Statistics Portugal, Banco de Portugal]

[⁽¹⁾ Others include for example: Agricultural products; Cork; Miscellaneous manufactured articles; Optical and precision instruments]

- ✓ Chemicals (inc. Pharma) showing stronger growth (11.1% cagr) and already an exports' weight of 4.1%
- ✓ Electrical and mechanical machinery has heavier weight in total exports (9.4%) and still is demonstrating steady growth (9.3% cagr)
- ✓ Vehicles and parts & aircraft has significant weight of total exports (8.1%) but has presented slow growth (1.1% between 2019 and 2023) due to the combined effects of the Pandemic, supply chain disruptions, rising production costs and green transition

Automotive and Mobility sector is an important industrial value chain in Portugal

80% of production in the automotive industry in Portugal is exported
